PROJECT 13

Digital Clock & Countdown Timer

Project Group ID: 13

Team Member	Roll Number
Het	21
Chandan	20

Project Description

• The Digital Clock & Countdown Timer is a simple program that displays the current time.

• It updates the time continuously so users can read hours, minutes, and seconds.

• The countdown timer allows users to set a duration for a specific task or activity.

• The timer decreases every second until it reaches zero.

• A clear message can be displayed when the countdown finishes.

• The project uses basic programming concepts such as loops, conditions, and time functions.

• It provides a useful way to understand time handling and build a practical beginner-level application.
